

RTLS Solutions for Industrial Environments

Improve worker safety
and accountability

Increase operational
efficiency

Digitalise your facility

Real Time Location

Automatic Mustering

Man Down

Lone Worker Protection

Access Control

Asset Management

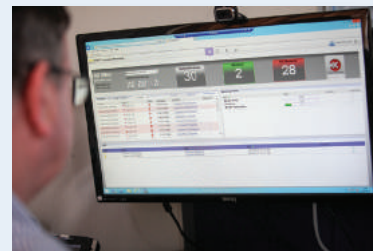

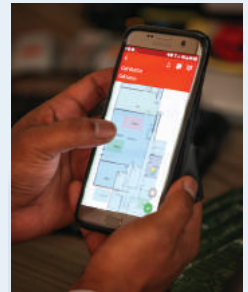

Wireless Networking

- Wireless access point enclosure system
- Intrinsically safe RF outputs
- Choose your Access Point from leading vendors like Cisco, Aruba, and more

MobileView Visibility Software

- Locate and monitor your assets and personnel in real time for improved safety and productivity
- IIoT integration - use data from both AeroScout and 3rd party devices
- Tailored for industrial applications
- Automatically triggered events that are configured to your criteria
- Fully scalable, enterprise-class system

Active RFID Tags

- Locate people or assets in real time
- Leverage standard Wi-Fi infrastructure for lower cost and easier deployment
- Options include combined passive RFID access control, condition monitoring (temperature, humidity, voltage), call buttons for emergencies, tamper proofing, additional LEDs for quick identification, and a range of mounting options

Tag Exciters

- Confirm location and manage tags at defined areas such as muster points, entry/exit points, and other chokepoints
- Trigger alerts and events based on location information
- Automate processes like emergency evacuations
